Set No 132

Directions: Study the following information carefully and answer the questions given beside:

In a linear row of 8 persons from A to H, four people face towards north and four towards south. Further information is given below.

B is third to the left of C, who faces (i) _____. Only D is adjacent to C. B is on the immediate right of G, who faces north. (ii) _____ is second to the left of G and faces north. A and E are immediate neighbors, where the latter is at an extreme end. F is second to the right of B, who faces (iii) _____. Not more than two persons facing same direction are adjacent to each other. H is on the immediate right of (iv) _____. The immediate neighbors of A face (v) _____ direction.

1. Which of the following will fill the blank (ii)?

- A. C B. A C. F D. D E. None of these

2. Which of the following will fill the blank (iv)?

- A. A B. B C. E D. D E. None of these

3. Which of the following will fill the blank (i)?

- A. South B. The direction opposite to the direction faced by H. C. North
D. Both options B and C E. Can't be determined

4. Which of the following will fill the blank (iii)?

- A. The direction same as faced by C B. The direction same as faced by D
C. The direction opposite to the direction faced by B D. North E. None of these

5. Which of the following will fill the blank (v)?

- A. South B. North C. The direction same as faced by C
D. The direction opposite to the direction faced by B E. None of these

The Question Bank

COMMON EXPLANATION:

Reference:

B is third to the left of C, who faces (i) _____.

Only D is adjacent to C.

B is on the immediate right of G, who faces north.

Inference:

With the second hint it is clear that C is at an extreme end, only then it is possible for C to have only one immediate neighbor i.e. D.

But we don't know whether C is at extreme right end or extreme left end, so we can have two possible cases.

Case-1: When C is at extreme right end and faces north

Case-1

Case-2: When C is at extreme left end and faces south.

Case-2

Reference:

F is second to the right of B, who faces (iii) _____.

Not more than two persons facing same direction are adjacent to each other.

Inference:

We can have different implications of the first hint in both the cases.

In Case-1: B must face South in order to place F second to its right.

Case-1

In Case-2: B must face North in order to place F second to its right.

As per the second hint, the immediate neighbors of B and G must face south direction.

Case-2

Reference:

(ii) _____ is second to the left of G and faces north.

A and E are immediate neighbors, where the latter is at an extreme end.

Inference:

Case-2 gets eliminated due to non-fulfillment of the first hint, because the person sitting second to the left of G does not face north direction.

Thus, we will proceed with case-1 only. We don't know the person sitting second to the left of G, but we definitely know that he/she faces north direction.

A and E are immediate neighbors with E being positioned at extreme end, thus A must be adjacent to F and E is at extreme left end.

Case-1

Reference:

H is on the immediate right of (iv) _____

Not more than two persons facing same direction are adjacent to each other.

Inference:

The only place left for H, is immediate left of B. Thus D faces south, only then H will be on immediate right of D.

As per the second hint, H must face north direction and F must face south direction.

Reference:

The immediate neighbors of A face (v) _____ direction.

In a linear row of 8 persons from A to H, four people face towards north and four towards south.

Inference:

As four persons face south direction, thus E must face south direction.

Therefore the immediate neighbors of A face south direction.

Answers :

1. Following the final solution, we get

A will fill the blank (ii).

Hence option B is correct.

2. Following the final solution, we get

D will fill the blank (iv).

Hence option D is correct.

3. Following the final solution, we get

North will fill the blank (i).

Hence option C is correct.

4. Following the final solution, we get

'The direction same as faced by D' will fill the blank (iii).

Hence option B is correct.

5. Following the final solution, we get

South will fill the blank (v).

Hence option A is correct.
