Common Explanation:

The first letter of the code represents the reverse letter of the first letter of the word.

For Example: Cut

The reverse letter of first word i.e. C is X.

Thus code will start with 'X'.

The second letter of the code represents the second next letter (as per alphabet series) of third letter from the right end.

The third letter from right end is C, thus its second next letter as per alphabet series is E.

Thus 'Cut' is coded as XE.
