QUIZ 73
Directions: Read the following information carefully and answer the questions given below.

Seven persons T, U, V, W, X, Y, Z like seven chocolates i.e. Dairy milk, Milky bar, Munch, Perk, 5 star, Ferrero Rocher and Kit Kat. They visited India Gate on different days starting from Monday to Sunday.
(i) T visited on one of the days after Thursday.
(ii) Only 4 people visited in between T and U .
(iii) The one who likes Munch chocolate visited immediately after $U$.
(iv) Only one person visited between the one who likes Munch and the one who likes 5 star.
(v) The one who likes Milky bar chocolate visited one of the days before V.
(vi) The one who likes Milky bar chocolate did not visit on Monday. W visited before $X$.
(vii) Only 1 person is in between W and X . W likes Dairy milk chocolate.
(viii) The number of persons who visited between $T$ and the who likes 5 star chocolate is one less than the number of persons who visited between $U$ and V .
(ix) Neither Z nor Y likes Kit Kat. Neither Z nor Y likes milky bar chocolate.
(x) $Z$ and $X$ did not visit on Saturday and $Z$ doesn't like Ferrero Rocher chocolate.

1. Which of the following chocolates is liked by the one who visited just before $Y$ ?
A. Ferrero Rocher
B. Perk
C. Milky bar
D. 5 star
E. None of these
2. Who among the following visited on Sunday?
A. V
B. $T$
C. $X$
D. Z
E. Can't be determined
3. Which of the following is true according to the given arrangement?
A. $X$ visited on Saturday.
B. T does not like Kit kat.
C. U visited on Tuesday.
D. All are true.
E. None is true.
4. $Z$ visited on which of the following days?
A. Thursday
B. Tuesday
C. Monday
D. Sunday
E. None of these
5. Which of the following chocolates is liked by Y?
A. 5 star
B. Kit Kat
C. Munch
D. Perk
E. Ferrero Rocher

## Correct answers:

| 1 | 2 | 3 | 4 | 5 |
| :---: | :---: | :---: | :---: | :---: |
| $D$ | $B$ | $C$ | $A$ | $E$ |

## Common Explanation:

## Reference:

(i) T visits one of the days after Thursday.
(ii) Only 4 people visited in between T and U .
(iii) The one who likes Munch chocolate visits immediately after $U$.
(iv) Only one person visits between the one who likes Munch and the one who likes 5 star.

Inference:
With the given hints following three cases arise. Case 1 and 2 are the main cases and Case 2A is a sub case of Case 2.

| Days | Case 1 |  | Case 2 |  | Case 2A |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Persons | Chocolates | Persons | Chocolates | Persons | Chocolates |
| Monday | U |  |  | 5 star |  |  |
| Tuesday |  | Munch | U |  | U |  |
| Wednesday |  |  |  | Munch |  | Munch |
| Thursday |  | 5 star |  |  |  |  |
| Friday |  |  |  |  |  | 5 star |
| Saturday | T |  |  |  |  |  |
| Sunday |  |  | T |  | T |  |

## Reference:

(viii) The number of persons who visit between T and the who likes 5 star chocolate is one less than the number of persons who visit between $U$ and V .
(v) The one who likes Milky bar chocolate visits one of the days before V .
(vi) The one who likes Milky bar chocolate does not visit on Monday. W visits before $X$.

## Inference:

Clearly, we can see that number of persons between T and the one who likes 5 star is 1 , so number of persons who visit between $U$ and $V$ are $1+1=$ 2.

Case 2 gets eliminated here because the hint (viii) is not fulfilled, the number of persons between $T$ and the one who likes 5 star is 5 , which is the maximum number, thus there is no place for $V$ to fix.

Here, we get one more case 2 A 1 which is a sub case of case 2 A .

| Days | Case 1 |  | Case 2[Eliminated] | Case 2A |  | Case 2A1 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Persons | Chocolates | Persons | Chocolates | Persons | Chocolates | Persons | Chocolates |  |
| Monday | U | Milky bar |  | 5 star |  | Milky bar |  | Milky bar |  |
| Tuesday |  | Munch | U |  | U | Milky bar | U |  |  |
| Wednesday |  | Milky bar |  | Munch |  | Munch |  | Munch |  |
| Thursday | V | 5 star |  |  |  |  |  |  | Milky bar |
| Friday | W | Dairy Milk |  |  | V | 5 star | V | 5 star |  |
| Saturday | T |  |  |  |  |  |  |  |  |
| Sunday | X |  | T |  | T |  | T |  |  |

## Reference:

(vi) .... W visits before X .
(vii) Only 1 person is in between $W$ and $X$. W likes Dairy milk chocolate.
(ix) Neither Z nor Y likes Kit Kat. Neither Z nor Y likes milky bar chocolate.
(x) $Z$ and $X$ do not visit on Saturday and $Z$ doesn't like Ferrero Rocher chocolate.

## Inference:

Here Case 1 and Case 2A1 get eliminated due to non-fulfillment of hint (ix).

In Case 1, only two positions are left out of which one is who likes Milky bar and we have only $Y$ and $Z$ left and neither of them likes Milky bar. Thus the case gets eliminated.

Similarly in Case 2A1, two persons are left i.e. y and $Z$ and two positions are left one on Thursday with the one who likes Milky bar and another is on Saturday, we do have hint that Z didn't visit on Saturday, but we also have another hint that $Z$ doesn't like Milkybar. Thus no place left for $Z$ to sit and the case gets eliminated.

So, the final puzzle is solved through case 2A.

| Days | Case 1[Eliminated] Hint (ix) violated |  | Case 2A |  | Case 2A1[Eliminated]Hint (ix) violated |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Persons | Chocolates | Persons | Chocolates | Persons | Chocolates |
| Monday | U | A Milky baf | W | Dairy Milk | W | Dairy Milk |
| Tuesday |  | Munch | U | Milky bar | U | - |
| Wednesday |  | Milky bar | X | Munch | X | Munch |
| Thursday | V | 5 star | Z | Perk | Dal | Milky bar |
| Friday | W | Dairy Milk | V | 5 star | V | 5 star |
| Saturday | T |  | Y | Ferrero <br> Rocher | Y |  |
| Sunday | X |  | T | Kit Kat | T |  |

## Explanations:

1. 

From the following arrangement it is clear that the one who visited just before Y i.e. V likes 5 star.

Hence option D is correct.
2.

From the following arrangement it is clear that T visited on Sunday.

Hence option B is correct.
3.

From the following arrangement it is clear that "U visited on Tuesday" is the only true statement from the given ones.

Hence option C is correct.
4.

From the following arrangement it is clear that " $Z$ visited on Thursday".

Hence option A is correct.
5.

From the following arrangement it is clear that "Y likes Ferrero Rocher".

Hence option E is correct.
